International technical service provider in electrical & mechanical installations

Epcido Group was founded by entrepreneurs, and today it counts more than 120 dedicated and skilled employees. Our M&E team comprises in-house managed technicians, site supervision, and project management services targeted to help clients turn their vision into reality, successfully delivering quality projects globally.

Safety, best practice and up-to-date knowledge are paramount. As a result, Epcido is accredited ISO 9001, 14001 and 45001, and we are active members of the Confederation of Danish Industry.

We operate the company from 3 locations with offices and workshop in Denmark and Poland, and we have registered subsidiary Epcido companies in Norway and the United Kingdom.

Our expertise in the industry ensure that our clients complete their projects on schedule, to the highest standards, and tailored specifically to their financial resources.

We focus on being the partner of choice in each of the specialist areas we work in – and equally on the retention and enhancement of our traditional reputation for delivering good value, complete trustworthiness and excellent quality of work.

OUR SERVICES

MECHANICAL INSTALLATION

Epcido have a team of highly skilled mechanical fitters, who can carry out all kind of mechanical assembly.

ELECTRICAL INSTALLATION

Epcido electrical engineers can carry out a wide variety of tasks to support your machinery needs, including installation of control panels, distribution supplies, and installation of all wiring.

TEST & COMMISSIONING

We also provide our clients with all necessary test and commissioning related to fully integrated installations involving automation and control systems.

OPERATION & MAINTENANCE

We offer full range of customer service and support packages tailored to suit the needs of your business.

HEALTH & SAFETY

Epcido places the health and safety of our workforce and those associated with our clients' projects as our highest priority. Health & Safety is embedded in everything we do, from the planning of our work activities to the processes we use each day.

Epcido's philosophy is that all accidents can be prevented, no matter the location, the scale or the complexity of the project. To this end, the company promotes a zero-accident culture within the business, supported through the active involvement and training of our employees in all our H&S programmes – from our Senior Leadership Team to our front-line operatives.

No matter where we work throughout the world, we pride ourselves that the whole business is aligned to work to one global H&S standard.

Epcido has a highly skilled workforce and that includes qualified and accredited specialists, providing the expertise to enable the company to manage the health, safety and well-being of our workers and safeguarding other contractors on our sites. This expertise provides the confidence and commitment to our clients that health and safety is given the utmost priority in the undertaking of their projects.

Our trained, qualified workforce and project teams of engineers, electricians, mechanical fitters, and riggers pride themselves on their ability to reduce production downtime for all our customers by safely and efficiently delivering projects to the highest standards.

Epcido's H&S and quality management systems are independently audited and accredited by external global auditing bodies. These credentials demonstrate our commitment to the safety of all operatives and to the continual improvement of our products and services.

A photograph of three male workers in a large industrial facility. They are wearing high-visibility yellow and black safety jackets and white hard hats with the Epcido logo. The worker in the foreground is smiling at the camera. The background shows industrial equipment and numbered pillars (22, 23, 24).

COME WORK WITH US

At Epcido we empower our people to be collaborative, curious and embrace their skills. We aim to attract the best and brightest people, whatever their background, to bring new perspectives to some of the most challenging and inspiring projects around the world.

We invest in training and develop your knowledge, expand your skills, and you get the chance to see the world and get to work with both inspiring colleagues and influential clients – whatever your passion, we have an opportunity that will bring out the best in you.

PROJECT CLOSURE

10

CELEBRATE**EPCIDO AS SUBCONTRACTOR**

Our technicians and specialists are trained according to world-wide standards, and can be hired to strengthen a workforce during peak-periods.

TIME-AND-MATERIAL PROJECT

Time-and-Material is generally used in projects in which it is not possible to accurately estimate the size of the project, or when it is expected that the project requirements would most likely change. In these cases, we offer time-and-material projects, based on time spent and material used.

SERVICE AND MAINTENANCE

Our field technicians are ready to support you with scheduled maintenance programs. All programs tailored to specific equipment requirements and we are flexible to fit with your operational demands.

No matter your needs and requirements we can provide you the needed help, support and maintenance.
